Hello, this is Tom Cookman with a Community Comment.

The attacks by President Obama on Mitt Romney are the sleasiest campaign ads any president has ever aired on TV. Obama cannot run on his dismal record, so he is doing everything he can to divert the attention away from who he is and what he stands for. Yes, Mitt Romney is rich and was a very successful businessman. Mitt Romney has money invested in foreign accounts, because every pension and 401K plan has diversified their investments which includes holdings in foreign countries. Mitt Romney earns money outside of the United States and pays taxes on these earnings. Obama is criticizing Romney for manufacturing in China. Every major manufacturing company in the United States is producing in China. Under Obama's watch, the uniforms our Olympic athletes are wearing, were made in China. Mitt Romney is a successful man who is honest, trustworthy, dependable and ethical. These are characteristics we don't often see in politicians. The two men that are running for President are complete opposites when it comes to handling the economy. Obama wants to portray Romney as a villain by claiming his business practices destroyed jobs, but the truth is that Mitt Romney has actually saved and created thousands of jobs. When Romney took over a company, it was headed for bankruptcy. This means that 100% of the jobs would have disappeared without intervention. In every campaign appearance President Obama is claiming that he has ordered the cabinet to cut one hundred million dollars in spending. There is research that confirms that the human mind cannot comprehend any number over a million. One hundred million is a huge number, but let us compare that to the 3.5 trillion dollars Obama is spending every year. A one hundred million dollar spending cut out of 3.5 trillion dollars is only 1/35,000th of total Obama spending. Let's compare this

claim with numbers we can process. If you spend \$2,000 per month on household expenses and agreed to cut your spending at the same rate that Obama is bragging about, it would equal SIX CENTS. One nickel and one penny out out of TWO THOUSAND DOLLARS. This is how dumb our President thinks we are. I spent \$2,000.00 and now I am going to sacrifice and only spend \$1,999.94, not to mention, after I took office I was the one who nearly doubled our spending to put us in this fiscal disaster. Obama has shoved this bloated government down our throats in the name of improving our economy. Well, here we are almost four years under his regime, and although our population has increased, there are fewer Americans working today than when he took office. This isn't a Republican/Democrat or Conservative/Liberal debate. It is an American debate and this President has once and for all confirmed that a huge government cannot improve our economy. There are FIVE MILLION fewer people working today than when he took office. If spending money created jobs, we would be in the greatest economic times in the history of our country. It seems that raising taxes on the rich is his only solution to economic recovery. Obama has already PROVEN that government spending doesn't create jobs, so why does he think raising taxes will save our economy? There is a solution to the mess we are in: lower taxes and cut the size of our government. This has a 100% success rate. If businesses are given more of THEIR money to reinvest, they will HIRE MORE EMPLOYEES. Also, every time taxes have been lowered, the government collects more money. This is about control, Obama doesn't give a rats you-know-what about the economy. He wants to control everything and that is, by definition, a DICTATOR.
